

## Physical & Financial Natural Gas Market (virtual)

Wednesday, October 13 - Thursday, October 14, 2021

### Course Overview

This class provides a good overview of natural gas markets for those needing to price and procure gas for electric and natural gas utilities, and covers the daily and bid week physical gas markets and how to use the NYMEX Natural Gas Futures and Financial swaps to hedge price risks. Attendees will review natural gas market basics, including terminology, concepts, and the mechanics of physical natural gas trading. The class will also discuss the effects on natural gas prices during the polar vortex that affected the Electricity Council of Texas (ERCOT), the heatwave affecting CAISO in 2020, and gas exports to Mexico and global markets. The course will conclude with a discussion regarding where natural gas markets are headed. [Click here to register!](#)

---

### Who Should Attend?

This class is ideal for personnel who need to broaden their understanding of natural gas markets, pricing, and hedging and as a refresher for those wanting review of current issues and trends affecting natural gas markets.
