Technical Management Program (in-person)

Tuesday, April 12 - Thursday, April 14, 2022

Course Overview

UCLA Extension's Technical Management Program (TMP) has been building leaders for the modern workforce. TMP is one of the most invigorating and forward-thinking programs in the world. If you are considering becoming, have recently been assigned, or are already performing as a supervisor, team leader, or manager, this program will provide you with the skills and knowledge to become a highly successful organizational leader. In the program, you'll discover the latest leadership techniques, strategies to set and clearly communicate goals to your organization, build strong self-directing teams, nurture collaboration, guide the efforts of individuals and groups to perform at the highest levels, motivate your employees to successfully achieve the organization's goals, and a strategic approach to project and program design for smooth execution. Attendees will receive the Certificate of Completion from UCLA extension at the end of the program. Click here to register!

Who Should Attend?

Personnel of the technical staff who are promoted into management roles and/or considering becoming or are already performing as a supervisor, team leader, or manager.
